Enhance your well intervention strategy by integrating innovative technology with well integrity, production enhancement and P&A best practice

- Market Overview
- Well Integrity & Restoration
- Production Enhancement
- Plugging & Abandonment
- Technology Developments
- Regulatory Environment

Keynote Speakers Include

- Amir Alwazzan
  Production Assurance & Technology Specialist
  Dragon Oil

- Ali Maghzi
  Completion and Well Intervention Engineer
  Petropars

- Damien Bassant
  Completions Superintendent
  DEA Group

- Yahya Al-Shekaili
  Senior Well Engineer (Operations)
  Petroleum Development Oman

- Jason Wheatley
  Manager WellWork Technical & Islands
  ADNOC Offshore

- Siddharth Jain
  Field Development Lead
  Sharjah National Oil Company (SNOC)

Sponsors & Exhibitors:

OWI MENA 2018 Workshop Snapshot

- **Industry-Leading Speakers** from across the GCC
- **12+ Exhibitors** in the Technology Showcase Hall
- **15 Countries** Attended OWI MENA in 2017
- **12+ Hours** of Dedicated Networking Onsite
- **180+ Delegates**
- **+30%** Operator Attendance
- **Interactive Break-Out Masterclasses**
- **2 Engaging Panels** on Integrity and Tech Development
Workshop Content

**PRODUCTION ENHANCEMENT:** Analyze how a proactive well work strategy making use of innovative uplift technologies can increase well stock value

**WELL INTEGRITY & RESTORATION:** Hear well diagnostics and leak remediation case studies as well as discuss aging field challenges including access to highly deviated wells and corrosion

**P&A:** Explore how contracting models, technology developments & planning can help ensure reliable & cost-effective large scale well abandonment operations

**EOR:** Consider the advantages of EOR techniques including gas, thermal and chemical injection to develop a strong EOR strategy and enhance production

**TECHNOLOGY DEVELOPMENTS:** Discover how innovative approaches to eline, slickline and CT can help you get the most out of your Middle East onshore and offshore assets

**REGULATORY ENVIRONMENT:** Discuss global approaches to well integrity examination and P&A regulations to highlight ways of developing appropriate local standards and best practice

---

"Great experience & excellent findings from operators & service companies"

Arsalan Ansari, Drilling, Completions & Workover Engineer, ADNOC Onshore

---

OWI MENA 2018 is proudly supported by

ICoTA
Intervention & Coiled Tubing Association
Welcome to OWI MENA 2018

The Middle East’s Leading Well Intervention Workshop

We’ve come a long way since our first OWI MENA workshop in Abu Dhabi in 2016! This year’s workshop builds on previous OWI MENA workshops, but also on experience we have gathered in other parts of the world, including the North Sea, Gulf of Mexico, Asia Pacific and West Africa. We are proud that this event has become such a key hub for regional well work professionals and we believe it is because of its critical focus on a single, clear objective – to help you optimize your well work efficiency. Through more than 30 hours of primary research, we’ve uncovered the highest priority challenges impacting the planning & execution of well intervention in countries including the UAE, Kuwait, Saudi Arabia, Oman, Iran, India, Egypt and many others...

By engaging with regional operators and international technology & service providers, we have put together a program that tackles issues such as the availability of equipment, well integrity and P&A challenges. OWI MENA will once again bring together leading Middle East stakeholders, as well as targeted case studies and updates on ground breaking campaigns from across the industry. By showcasing regional and international projects as well as innovative processes and technologies, the workshop will provide operators with the information needed to more efficiently increase production and ensure the integrity their onshore and offshore assets.

SAM SCARPA
Head of Conferences
Offshore Network Ltd.
T: +44 (0) 203 793 8800
E: ss scarpa@offs net.com

“Very well organized and a fantastic opportunity to learn more about existing and emerging technologies”

Amir Alwazzan, Production Assurance & Technology Specialist, Dragon Oil
This year, OWI MENA is welcoming world class well intervention experts from across key areas of the Middle East allowing you to expand the scope of your well work strategy and learn from experience from across the GCC and beyond.

**OPERATORS**

- **Andrew Wills**
  WO-WWTI
  ADNOC Offshore

- **Jason Wheatley**
  Manager WellWork
  Technical & Islands
  ADNOC Offshore

- **Damien Bassant**
  Completions Superintendent
  DEA Group

- **Hamish Thompson**
  Completions Manager
  Dubai Petroleum

- **Yahya Al-Shekaili**
  Senior Well Engineer (Operations)
  Petroleum Development Oman

- **Ali Maghzi**
  Completion and Well Intervention Engineer
  Petropars

- **Dr. Rakesh Kumar Vij**
  Advisor
  ONGC

- **Amir Alwazzan**
  Production Assurance & Technology Specialist
  Dragon Oil

- **Siddharth Jain**
  Field Development Lead
  Sharjah National Oil Company (SNOC)

- **Hamish Thompson**
  Completions Manager
  Dubai Petroleum

- **Yahya Al-Shekaili**
  Senior Well Engineer (Operations)
  Petroleum Development Oman

- **Ali Maghzi**
  Completion and Well Intervention Engineer
  Petropars

- **Siddharth Jain**
  Field Development Lead
  Sharjah National Oil Company (SNOC)

**WELL SERVICE COMPANIES & WELL INTERVENTION TOPICS EXPERTS**

- **Callum Scullion**
  Product Development Manager
  Aubin

- **Tobben Tymons**
  Sales and Marketing Director
  EV

- **Steve Ross**
  Country Manager – UAE & Egypt
  Interwell

- **Simon Sparke**
  Well Integrity Domain Champion
  TGT Oil and Gas

- **George Galloway**
  Director
  The Well Academy

- **Sergey Feoktistov**
  Sales Director, Europe, Middle East and Africa
  Visuray

- **Hesham Helmy**
  Geozone Service Delivery Manager
  Weatherford

- **Miguel Diaz**
  Business Development Manager
  Welcem

*“Overall experience and value gained at OWI MENA 2017 9/10” Tamer Taha, Senior Workover Engineer, OMV*
Audience

This year’s audience will consist of 160+ senior well work professionals gathered to define their organisation’s well intervention strategy. By bringing together a diverse audience including Team Leads and Heads of Production from regional operators as well as downhole technology providers at the cutting edge of their sector, our model ensures you will meet the right people, allowing you to develop a network that will define your business development strategy for 2019.

How likely are you to attend OWI 2018 9/10
Noor Nazri Bin Talib, Stimulation Specialist, ADNOC

The relevance of the Technology Showcase Hall to your business 10/10
Amir Alwazzan, Production Assurance & Technology Specialist, Dragon Oil

Quality of the Networking onsite 9/10
Shafeeq Alhalwaki, Sales Manager, AlMansoori

“Really interesting presentations. Good networking”

Geoffrey Tiberghien, Well Integrity Engineer, Total ABK

REGISTER TODAY >>
SECTION 1: New Technology Implementation

The Importance of Innovation & New Technology Deployment
- Hear how the creation of the Technology & Innovation Department in Dragon Oil has helped different teams develop new innovative ideas, tools and equipment
- Learn how the Technology & Innovation Department led the production enhancement teams to define common challenges and identify technology gaps
- Emphasize the importance of cooperation with service providers and allowing them to share potential solutions to common challenges and technology gaps

Amir Alwazzan, Production Assurance & Technology Specialist, Dragon Oil

Technology & Innovation Panel
- Examine the importance of early engagement between service companies and operators to encourage a life of field approach to well work
- Outline the importance of collaboration between teams to ensure a consistent approach to well work and the identification of technology gaps
- Uncover challenges to new technology adoption in the Middle East and discuss the value of innovation in increasing efficiency for well intervention, integrity and P&A projects

Jason Wheatley, Manager Well Work Technical & Islands - WO-WWTI, ADNOC Offshore
Yahya Al-Shekaili, Senior Well Engineer (Operations), Petroleum Development Oman
Moderated by Damien Bassant, Completions Superintendent, DEA Group

SECTION 2: Production Enhancement

Main Challenges in WI Operations
- Discuss the various phases in the well lifecycle and consider the role of completion string and downhole equipment design during the well intervention phase
- Analyze how some rig operations may be replaced by rigless well intervention and understand the main challenges in selecting candidate wells in the future
- Outline how new technology can be applied to optimize time & cost savings and debate the role financial considerations will play

Ali Maghzi, Completion and Well Intervention Engineer, Petropars

Smart Well Intervention for Production Enhancement
- Understand challenges relating to the reservoir management of mature fields and consider implications for your Middle East assets
- Access a success story of a well intervention and reservoir management project in the onshore Kalol field and takeaway lessons learnt
- Analyze a recent IOR development scheme and how this was implemented offshore for a smart well intervention production enhancement project

Dr. Rakesh Kumar Vij, Advisor, ONGC

Reducing Uncertainty in Well Intervention and Workover
- Examine how X-ray diagnostics can benefit well intervention and workover, and gain a full technology outline to completely understand the capabilities
- Simplify planning, eliminate uncertainty and save costs by utilizing the ‘Intelligent Intervention’ methodology
- Hear global case studies from three different continents that show a 100% success record for the X-ray diagnostics

Sergey Feoktistov, Sales Director, Europe, Middle East and Africa, Visuray

SECTION 3: Well Integrity & P&A: Complex CT Rigless Leak Remediation in Highly Deviated Application
- Discuss an offshore leak remediation case study and understand why a complex rigless option was selected
- Analyze the challenges of intervening on a highly deviated well and outline the implications for equipment selection and project delivery
- Hear the planning, execution and project results to benefit from major lessons learned for your upcoming integrity projects

Andrew Wills, Senior Workover Engineer, ADNOC Offshore
Technology Advancements with Logging High Chrome Tubulars
• Analyze why corrosion is a big challenge for Middle East operators and how logging with electromagnetic tools is a standard operation in regular tubing and casing
• Outline how as the chrome and nickel content increases, difficulties also increase in obtaining reliable results, due to the much reduced electromagnetic properties of the steel
• Hear the results of a yard test with 28% chrome pipe and the logging outcomes and requirement for advanced magnetic techniques
Simon Sparke, Well Integrity Domain Champion, TGT Oil and Gas

Well Barriers and Plugs
• Understand how a polymer resin solution can solve integrity challenges by curing into a strong and flexible solid that can withstand thermocyclic expansion and contraction of the casing without cracking
• Define common applications including lost circulation, compromised wellbore integrity and plug and abandonment to grasp the potential for your upcoming projects
• Hear case study examples including the remediation of sustained casing pressure and the plugging of a well with no mechanical integrity
Miguel Diaz, Business Development Manager, Wellcem

38 Wells Abandonment Campaign P&A
• Hear how a well P&A campaign was successfully undertaken over 1.5 years in an offshore environment to apply lessons learned to upcoming shallow water decommissioning candidates in the middle east
• Discuss how 38 wells, linked to 5 platforms, were abandoned and grasp the unexpected challenges associated with the varying natures of the wells
• Understand how alternative equipment had to be used for different wells and the lessons learned from this campaign which was completed within budget and without incident
Hesham Helmy, Service Delivery Manager, Weatherford

Well Integrity Panel Discussion
• Understand how leveraging best practice, new technology and the transfer of knowledge can ensure the integrity of mature wells
• Develop an end-to-end well integrity management system that incorporates new technology, appropriate commercial models & effective training to support integrity projects
• Outline the role new technology plays in Middle East well integrity and the necessary steps required to introduce new tooling to the region
Siddharth Jain, Field Development Lead, Sharjah National Oil Company (SNOC)
Simon Sparke, Well Integrity Domain Champion, TGT Oil and Gas

SECTION 4: New Technology Developments
Downhole Visual Analytics
• Identify the key challenges of well integrity operations and the specific risks, constraints and complexities faced by operators late-life assets
• Understand the concept of visual analytics and learn how advanced, integrated video systems have risen to the challenges of today’s information needs
• Demonstrate how the application of these real-time and near-time solutions enables decisive, effective well interventions
Tobben Tymons, Sales and Marketing Director, EV

Xmax Well Enhancement Technology
• Uncover a toolbox of chemical products designed to improve oil and gas production by reducing water production and enhancing injection water sweep efficiency
• Analyze how it protects oil zones and how the standard downhole chemical application combined with low risk chemistry improves production economics
• Discuss the importance of maintaining a good environmental profile and ensuring equipment is safe to use
Callum Scullion, Product Development Manager, Aubin
Thru Tubing Intervention and High Expansion Technologies

- Discuss the benefits of retro fitting thru tubing intervention and high expansion technologies and understand how to do more with less to get the most out of your Middle East assets
- Outline the potential usage of high expansion straddles for workover operations and how specific solutions can be developed for production control challenges
- Hear how velocity string solutions can be employed to ensure heavy loads can hang off the packer in wells with reduced or no production before being retrieved in a single operation

Steve Ross, Country Manager – UAE & Egypt, Interwell

OWI MENA Agenda

The quality of the information disseminated at the conference

9/10

Glenn Tore Iversen,
F&R Business Development Manager,
Schlumberger

“Excellent workshop for well intervention, very informative, experienced speakers, great case studies”

Dr Rakesh Kumar Vij,
Advisor,
ONGC

REGISTER TODAY >>

PLUS 2 ADDITIONAL WORKSHOPS

1. Well Integrity Management
   Outline international well examination best practice and regulations and explore options for a regional MENA approach to well integrity management

2. Preparing for P&A
   Define planning and operational challenges and consider how regional collaboration can help prepare regional operators for P&A operations
Is your company taking advantage of well intervention opportunities in the Middle East? Join us at OWI MENA if you are:

- **A market leader** and want to position yourself alongside major operators on the program
- **A regional service provider** seeking to reinforce your brand and win new business
- **An established contractor** looking to enter the Middle East market for the first time
- Recently completed a “first of a kind” project and would like to share your experience
- Developing a **new, innovative technology** that you would like to gain exposure for...

We can help you by providing:

- **BRAND EXPOSURE**: Position your brand as a leading intervention service provider through our website, social media groups, workshop brochure and onsite at OWI MENA
- **THOUGHT LEADERSHIP**: If you have an innovative story to tell, a unique service or ground-breaking technology, share it as a speaker at the workshop through a presentation or case study
- **NETWORKING**: As the centre stage of all networking breaks, our technology showcase hall will give exhibitors a physical location for prospective clients to find out about your services

**WHY SPONSOR?**

“Great networking opportunity”

David Ringrose, VP Middle East, Hydrawell

“Excellent event. Great networking. A “must for 2018””

Steve Pigg, Regional Sales Manager, Maersk Training

2. Register online
3. Email us directly at sales@offsnet.com with your chosen pass type

PREMIUM PASS
Book before 2nd August 2018 and Save $800

What’s Included:
- 2 day conference pass
- Access to technology showcase hall
- Networking drinks reception and luncheon
- Post conference proceedings

Additional Premium Pass Features:
- Preferential access to training workshops
- Priority conference room seating
- Access to VIP pre conference reception
- Express registration

Early Bird - Book by 2nd Aug 2018 $1095
FULL PRICE $1895

STANDARD PASS
Book before 2nd August 2018 and Save $800

What’s Included:
- 2 day conference pass
- Access to technology showcase hall
- Networking drinks reception and luncheon
- Post conference proceedings

Early Bird - Book by 2nd Aug 2018 $995
FULL PRICE $1795

DATE & VENUE
October 9-10
Le Royal Meridien Abu Dhabi

Terms & Conditions: Payment Policy: Full payment is due within 28 days of ticket reservation and must be paid in full 1 week prior to event registration, whichever comes first. Registration will not be confirmed until full payment has been received. Cancellation and Refunds: Cancellations must be received in writing. If cancellation is received within 28 days of the conference, the attendee will receive a full credit to a future conference. If cancellation is received more than 28 days from the conference, Offshore Network Ltd will retain 10% of the attendance fee for administration purposes or offer a full credit to a future conference. Places are transferable at no extra charge. In the event that Offshore Network Ltd cancels a conference, payments received at the cancellation date will be credited back in full to all attendees. All conference credit notes remain valid for 2 years. Changes to Conference Programme and Agenda: Offshore Network Ltd reserves the right to postpone or cancel an event, to change the location or alter the advertised speakers for an event at any time. Any Changes to the agenda will be updated on our website as soon as possible.
